The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).								
Status								
1)⊠	1) Responsive to communication(s) filed on <u>28 August 2006</u> .							
	This action is <b>FINAL</b> . 2b)⊠ This action is non-final.							
3) 🗌	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is

#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-6, 8-10, 12-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mills et al. (6,840,561) in view of Hier et al. (US 2003/0184064).

Mills et al. disclose an automotive sun visor that has a core member (12), a cover layer (14) and a support arm (16). The core member (12) has an outer surface. The cover layer is located on the outer surface of the core member. The support arm (16) is coupled to the core member (12) and adapted to mount the visor proximate the windshield of a vehicle. In reference to claim 2, the core member is formed from a polymeric material, polypropylene, having a hardness that is relatively higher than a hardness of the cover layer. In reference to claim 3, the core member comprises first and second sections (20,22) joined together in a confronting arrangement, as seen in Figure 13. In reference to claim 4, the first and second sections (20,22) are hingedly coupled together for folding toward the confronting arrangement by living hinge (24). In reference to claims 5 and 12, the cover layer substantially encapsulates the core member. In reference to claims 8, 9, 14, 15, 17, and 18, an accessory, a mirror (182) is affixed to the core member (12). In reference to 10, the core is made of a polymeric material. Then, the cover layer (14) is located on the outer surface of the visor core. Finally, the support arm is coupled to the visor core. However, Mills et al.

Application/Control Number: 10/711,457

Art Unit: 3612

Page 3

do not disclose forming the cover layer in place of a polymeric material such that the mirror is integrally molded with the cover layer.

Hier et al. teach forming a polymeric cover layer in place onto the outer surface of the harder core member of a vehicle interior part, as disclosed in Figure 7.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to cover the core member of Mills et al. with a formed in place polymeric cover layer, as taught by Hier et al., in place of the cover layer of Mills et al. to provide a seamless cover that requires less steps to manufacture.

3. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of references, as applied to claim 1, in view of Fischer et al. (GB2336577).

Mills et al., as modified, do not disclose the cover layer being textured to simulate fabric material.

Fischer et al. teach a polymeric covering material, polypropylene fabric, which is textured to simulate a fabric material.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to form the cover layer of Mills et al., as modified, with a polymeric material that has a texture that simulates a fabric material, as taught by Fischer et al., to provide the desired appearance and texture.

### Allowable Subject Matter

4. Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

## Response to Arguments

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Greg Blankenship whose telephone number is 571-272-6656.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Dayoan can be reached on 571-272-6659. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
